The NEW WESTMINSTER NEWS

The Weather. New Westminster and the lower mainland: Light to moderate winds, generally fair, stationary to higher temperatures.

VOLUME 8, NUMBER 14

NEW WESTMINSTER, B.C., TUESDAY MORNING, AUGUST 26, 1913.

PRICE FIVE CENTS

PEOPLE TO VOTE ON COQUITLAM LAKE DEAL

Proposed Agreement Between City and B. C. E. R. to be Referred to Ratepayers Subject to Government Sanction—If Approved Public Meetings Will Be Held and Matter Discussed in Public—Other Business.

The city council met last night in usual weekly session. The proposed agreement between the B. C. E. R. company, the city council and the Dominion government in regard to Coquitlam lake was read, and subject to the sanction of the Dominion government, it will be referred to a plebiscite of the ratepayers of the city.

The terms of the agreement are substantially what was shadowed forth in The News of Saturday. The principal items are that the company having obtained a grant of 10,000 inches of water in Lake Coquitlam in 1903 agree to give 1000 inches of this to the city, if required, in addition to what the city are entitled to take already. The company also undertakes to keep pure the water of the city.

Arbitration on possible disputes regarding the purity and sufficiency of the water supply of the city shall be decided by the minister of land of the provincial government and minister of the interior, Dominion government.

The company shall pay all the expenses of litigation, solicitors and counsel's fees, already incurred by the city not to exceed a blank sum.

In addition the company shall pay a sum of \$11,000 down, and an annual sum of \$1000.

In return the city agrees to relinquish its rights to the land round the lake.

The mayor said that all that was required last night was to go on record that if the Dominion government sanctioned the agreement the council would put it before the ratepayers for their approval or disapproval. If the Dominion government sanctioned it there would likely be public meetings and every councillor would have an opportunity of explaining his attitude on the matter.

The subject then dropped.

Great Improvements.

City Engineer Blackman wrote with reference to the Columbia street improvements opposite the Dominion government property. He suggested that the city solicitors be instructed to lay an application before the railway commissioners at their next session asking for an order that the C. N. R. company pay a proportion of the cost of the construction of the proposed retaining wall on the southern boundary of the street.

Park Repairs.

Alderman Jardine reported on behalf of the parks committee. That the construction of the fence and entrance gates on First street in Queens park is being carried out by day labor under the supervision of Thomas Turnbull and W. E. Townsend. That the tender of H. Gosse for moving the poultry building, being the lowest, \$563, be accepted.

That J. A. Calbeck be engaged to move the dairy building by day labor under the supervision of the building inspector at a cost not exceeding \$150.

Big Hose Order.

Alderman Henley, chairman of the fire committee, asked authority to purchase 1500 feet of rubber hose.

Alderman Bryson said he would not like to do anything binding them not to call for tenders.

The mayor explained that all Alderman Henley wanted was power to act, to get local tenders.

Alderman Henley—The local merchants will have a chance of handling it and they can do it just as cheaply as elsewhere.

Works Report.

Alderman Dodd submitted the board of works report and recommendations which were as follows:

That the application of J. P. Simonds for sidewalk on Tenth avenue between First and Second streets be not granted at present. Estimated cost would be \$150.

That the petition of W. E. Sinclair and others for extension of sidewalk on Nanaimo street and down Sixteenth street to Sixth avenue, be granted only as to the sidewalk on Nanaimo street, which has been previously recommended at an estimated cost of \$149. That there is no need at the present time of extending the sidewalk down the east side of Sixteenth street, but a crossing should be constructed to meet with existing sidewalk on Sixteenth street.

That the request of Messrs. Gardner & Mercer for the raising of the sidewalk to new grade on Thirteenth street and Fourth avenue be granted when the stones are let. Estimated cost \$115.

That the application of J. D. Warneck and others for sidewalk on Kelly street north of Broad street be granted. Estimated cost \$110.

That the request of J. I. Rigstad for sidewalk on Sixteenth street north of Seventh avenue be not granted. Estimated cost would be \$45. The present sidewalk on Seventh avenue is within 200 feet of the property of the applicant.

That a surface box and culvert be laid on Third avenue from Eleventh to Twelfth streets to prevent as far as possible a recurrence of the roadway being washed out by heavy rains. Estimated cost \$80.

That the sidewalk and fence on Clarkson street east of Clarkson street be renewed at an estimated cost of \$25.

That the necessary valves for the outfall of the Sapperton sewer, section No. 2, be purchased. Cost of same \$17500. It will take some four months to obtain delivery of these valves which are required before the outfall can be constructed. Payment (Continued on Page Four.)

MILLHAND DIES AT LOVER'S FEET

Portland Man Shot in Apartment of Flancee—Thought to Be a Suicide.

BURNABY CEMETERY NOT DEAD ISSUE

Some Councilors Think that Extension of Plot from Taxation is Coctly—Other Views.

Further objections were made in the Burnaby council chamber last evening to the proposal of Vancouver to locate a cemetery in North Burnaby, and steps will be taken by the municipal solicitors to place all the matter as to the extension of the plot in the hands of the provincial officer of health, so that when the application comes from Vancouver for approval of the plans, Burnaby will be ready to fire its broad side against such a proposition, unless they obtain a fair and square deal.

The chief objection, as voiced by the councillors last evening, was the fact that not only will Burnaby lose several thousand dollars a year in taxes, by reason of the property being exempt from same, but it will also be required to keep the roads in first class condition. This latter item considering the sparse settlement in North Burnaby at the present time will fall upon the shoulders of the whole of the electorate.

Seeing that should Vancouver locate its cemetery there, the B. C. E. R. would of necessity extend its car lines through the northern section, the ratepayers of Hastings Grove have voted in favor of the cemetery site and informed the council so by letter. Councillor Fau Vel upheld the decision of his constituents, but his vote was only one in many and the decision to take the matter up with Dr. Fagan carried.

Residents of Broadview came down in numbers to ask for assistance and help in the way of water and a sidewalk. One member of the delegation appealed to the council, stating that there was a school opened in the district and as yet the children were unable to get drinking water. This serious situation, which applies also to over a hundred families, will be entered into by the council.

The establishment of a motor stage between Coquitlam and Vancouver Heights was mooted by Councillor Macdonald, who asked that the Western Canada Power company be required to fulfill their obligations in the matter of improving the Johnston road. A motion to do so was carried.

ROMANTIC WOOING OF INDIAN PRINCE

After Many Rebuffs Powerful British Indian Families United in Marriage in London.

London, Aug. 25.—Two of the most powerful native ruling families of British India were united today when Princess Indira, only daughter of the reigning Maharajah Gaekwar of Baroda, was married here to Prince Jitendra, son of the Maharajah of Cochin Behar, after a romantic courtship.

The initial ceremony, which took place in the strictest privacy, was performed at the hotel where the young bride has been staying, and was accompanied by the customary Hindu rites, as prior to the marriage the Princess Indira had been received into the Brahman faith, the creed of the bridegroom. Subsequently the form of a civil marriage were gone through at a registry office.

The most intense interest had been aroused in the attachment of the couple whose wedding had first been fixed to take place in India on May 5, but was suddenly broken off, after which the bride and her parents sailed from Bombay for England, and were followed by Prince Jitendra.

The bridegroom created something of a sensation this morning by appearing at the hotel in his magnificent Indian robes of white silk, heavily embroidered. Subsequently the bride's father and brother, Shri. Mal Jaisingrao, are both well known in the United States, where the latter studied at Harvard. Her mother, the Maharani, is a woman of advanced ideas and is the author of a book on the position of women in India.

NORTHERN CHINESE FORCES CLOSING ON NANKING

Shanghai, Aug. 25.—The northern forces are closing in on Nanking, where much desperate fighting has taken place during the last fortnight. Heavy casualties have resulted and many wounded have been brought to Shanghai. The northerners have now finally captured Purple mountain, the western ridge of which has changed hands many times.

General Chang, of the government forces, has depended more upon fire assaults than upon military skill.

LONDON'S BEST PAINTERS STRIKE FOR ARTIST'S CAUSE

London, Aug. 25.—A strike of house painters and decorators in London far increased wages, which was followed by the employment of non-unionist painters at the admiralty, has brought about a strike of electricians under control of the official of public works, in protest against the employment of black legs.

PILOT CARTER NOT TO BLAME

Actual Handling of Herakles All That Could Be Desired.

Council Regrets Misunderstanding of Pilot Board—Fortnightly Soundings.

Alderman White, chairman of the harbor committee, reported to the city council last night of the stranding of the steamer Herakles at the mouth of the river, the investigation by the pilot board, and its conclusions.

The report was as follows: The committee absolve Pilot Carter from any blame as regards the actual handling of the ship.

The committee consider it a matter of regret that more frequent soundings of the channel were not taken by the pilot, but this seems to be due to a misunderstanding on the part of the pilot board and the pilot as to the facilities at their disposal through the Dominion department of public works to enable the pilot to make such soundings.

The chairman of the committee, with Captain Meyers, of the pilot board, called upon the resident engineer, department of public works, and were by him notified that whenever the Samson goes down the river the pilot may go with her to make soundings and in case of necessity, such as a large ship coming in the Samson or other boat will be sent specially for that purpose.

The pilot will also be afforded accommodation on the Frabling dredge to meet incoming vessels.

WILSON DECIDES TO READ MESSAGE

Lind Terminates All Negotiations—Leaves Mexico Today.

If Necessary States Will Increase American Border Patrol to Enforce Policy.

Washington, Aug. 25.—President Wilson will read his message on the Mexican situation at the capitol tomorrow. This was decided at midnight, following the receipt of a message from John Lind, personal representative of President Wilson in Mexico, that he had said good-bye to Foreign Minister Gamba, and would leave Mexico City tomorrow.

Negotiations so far as Mr. Lind is concerned, have been terminated. The United States will receive any further proposals through Charge d'Affaires O'Shaughnessy, of the American embassy.

The policy of the United States was outlined to the members of two congressional committees of foreign relations today at a conference at the White House by President Wilson and Secretary Bryan.

Message Approved. The president's message received practically unanimous approval. The future course of this government will be one of non-interference, in the hope that the effect of its present efforts and the pressure of foreign governments will constitute a moral suasion that ultimately will bring about peace in Mexico.

During tonight's conference, the president read to the committees not only the full text of his own message, but the notes exchanged between John Lind and Huerta. One of the committee men said afterward that the Huerta note, written by Foreign Minister Gamba, was one of the finest state papers he had ever seen.

BOTH MUST HANG.

Ottawa, Aug. 25.—The government has decided that there will be no interference in the capital cases of Charles Watt, of Amherst, N.S., and Henry Wagner, of Nanaimo, B. C. Both will be executed on Thursday.

MRS. PANKHURST'S ONE WISE MOVE

Agrees to a Truce to Allow Sane Efforts Toward Extending Suffrage to Women.

London, Aug. 25.—Rumors which have been current of a truce between the militant suffragettes and the government, seem to find support in a letter written today by Mrs. Pankhurst, leader of the militant suffragettes, to her followers, advising them to take a holiday for the present.

She says: "I am gathering strength for a renewed battle when the holiday season is over. I hope that every one of you will take advantage of the present lull in political activity to take the rest and change you have all so richly deserved."

Another indication that an agreement has been reached is the cessation by the authorities of the enforcement of the provisions of the "cat and mouse act." Out of 43 suffragettes sentenced to imprisonment for various offences, only one is now in jail. Most of the others are following their ordinary vocations and no attempt is made to arrest them.

It is believed that Mrs. Pankhurst has at last agreed to a truce, in order to strengthen the hands of those members of the British parliament who are working toward the enfranchisement of women in a government measure.

COL. DAVIDSON MAY BE BUYING ROAD

Understanding in London, Ont., that Big C. N. R. Man is After Street Railway There.

London, Ont., Aug. 25.—While all street railway officials here deny that their road has been sold or that negotiations are under way, it is generally understood here that some kind of a deal is on. Colonel Davidson, of the Canadian Northern, has been in London twice within the past ten days. He was accompanied once by Engineer McRae, of Toronto, and on both occasions made trips to the vicinity of Dutton. The London Street railway only operates in the city.

Officials of the London and Lake Erie Transportation company, which operates between London and Port Stanley, state that no negotiations have been started for the purchase of their road. The C. N. R. recently purchased a large gravel pit just south of the city.

ESTIMATED DAILY CUT AT ONE MILLION ACRES

Saskatoon, Aug. 25.—Dean Rutherford, of the agricultural college, estimates that one million acres of the wheat in Saskatchewan are being cut daily. Taking the average yield at 20 bushels per acre, which Hon. W. C. Sutherland estimates is most conservative, this means that twenty million bushels of wheat are being cut each day, taking 70 cents as the average price, a farmer will receive per bushel, it means that every day of such weather as prevailed today and on Saturday is worth about \$14,000,000 to the farmers of this province.

GERMAN SOVEREIGNS GET TOGETHER

Kelheim, Aug. 25.—All the German sovereigns, including Emperor William, and the heads of the city republics of Hamburg, Bremen and Lubek, have assembled here as the guests of the prince regent of Bavaria to commemorate in the great hall of liberation, the defeat of Napoleon in 1813.

CHURCH FOR HOTEL TRADE NOT COMPLETE

Presbytery of Westminster Must Decide on Exchange—One Woman Opposed to Deal.

Coquitlam, Aug. 25.—It is now practically up to the Presbytery of Westminster to decide whether the congregation of St. Andrew's Presbyterian church should accept the proposition of a local hotelkeeper, W. Rowley, to exchange a portion of the site on which the church at present stands for a double corner on Shaughnessy and Marpole streets.

The congregation met this evening and a vote was taken. The result was rather complicated and because of the fact that the vote of the members could not be called representative, it was decided to appoint a deputation to attend the next meeting of the Presbytery giving that body the final say in the matter.

BANISH TRUSTS BY CO-OPERATION

"Each for All and All for Each," Policy of Earl Grey.

Before International Convention at Glasgow He Says This Will Reconcile Capital and Labor.

Glasgow, Aug. 25.—Co-operation as the basis of the ideal state of the future, was the keynote of the address of Earl Grey, former governor general of Canada, at the opening of the congress of the International Co-operative alliance here today. Co-operation has put a barrier against the tyranny of the trusts, he said, and would reconcile the warring forces of labor and capital.

Six hundred delegates were present, representing two million members of co-operative societies in America and Europe, and Earl Grey's views, enunciated with much fervor, were loudly applauded.

He declared that the application of the co-operative principle to the industrial life of Great Britain, the United States, France, Germany, Denmark and Ireland, were proved by the substitution of organized distribution for individual buying, co-operative transportation and marketing for industrial selling, and the co-operative use of power or individual use of machinery. The wants of both producer and consumer could thereby be met more effectively at a smaller cost, thus securing to the consumer a reduction in the cost of living, and a greater command not only of the necessities but the comforts and conveniences of life.

By some means they obtained possession of a small saw, and after several hours work, unnoticed by the guards, they succeeded in liberating themselves from the cells, and attacked Guard Day as he was patrolling his beat. Guard Hibben, Jailer McMartin and Warden Brynner, hearing the cries of Day as he was being beaten down, rushed to the scene and overpowered Clark, Davis in the meantime having made his way back to the cell.

From information received, it seems that this was not the first time that the two men had shown fight, in fact during their incarceration in the Vancouver city jail, Clark had succeeded in wrenching an iron bar from the cell window, but was discovered in the nick of time.

A few weeks ago both men were drawn on the carpet for violating the prison rules, with the result that they were placed in the solitary confinement cell and supplied with bread and water for a few days.

Warden Brynner says it is a miracle that Guard Day was not knocked unconscious by the first blow administered by Clark, which had it been done, would have given the prize to a chance to liberate many of the other men under guard there, and perhaps to have brought about a wholesale jail delivery.

Guard Hibben was noticed on the street last evening with his head covered with bandages and walking with a decided limp, caused by his scuffle with Clark, on the stairway. Hibben received a nasty crack over the side of the head with one of the iron bars, but the doctor hopes to save the necessity of having to put stitches in which will prevent any scar from showing.

Day, according to the hospital authorities, is slowly recovering from his injuries, although it will be a matter of several days before he is able to leave that institution.

Just what will happen to Clark and Davis is yet uncertain. They are scheduled to appear at the fall assizes to answer a charge of murder, and it is probable that little or nothing will be done to them in the interim. They will undoubtedly be kept closely guarded in separate and doubly strong cells.

MURDER OF GERMAN AND BRITISHER

Mexican Bandits Kill Two Prominent Men—Englishman Well Connected in London.

Mexico City, Aug. 25.—The murder of Fitzhugh Lawton, a British subject, and Thaddeus von Thaden, a German, on Esmer Turbide's ranch, in western Michoacan, was officially reported today. The British minister has sent notification to his home office.

Lawton was well connected in England. He was related by marriage to John Nuttall, the noted archaeologist, formerly of San Francisco and now of Mexico, who holds the honorary professorship of archaeology of the National museum.

Von Thaden's mother is an American. The men were employed at the ranch and at the time of their murder had in their possession large sums of money for the payment of the men. They were robbed by their assassins, who are characterized as bandits, not robbers.

COULD HAVE FREED ALL PRISONERS

Attempted Escape at Provincial Jail Might Have Been Serious.

Unruly Men, Clark and Davis Being Held on Charge of Murdering Constable Archibald.

More details of the terrific fight which took place in the provincial jail early yesterday morning when Guards Day and Hibben were seriously injured, were brought to light yesterday, the import of which was printed exclusively by The News yesterday morning. Owing to the reluctance of the jail to give out any information, unless with the consent of Warden Brynner, The News was unable to learn just who had been hurt, with the exception of Guard Day, who is still lying in the Royal Columbian hospital.

Day, it now appears, was set upon by two Vancouver men named Clark and Davis, who are being held for trial on a charge of murdering Police Constable Archibald in Vancouver a few months ago.

Guard Fred Hibben, formerly of the local police force, was the other guard who was injured, although his hurts were not to be compared with those sustained by Day in the fracas.

The whole plot reveals a desperate attempt of the two men, Davis and Clark, to escape from custody before they could be tried for the alleged murder of Archibald.

By some means they obtained possession of a small saw, and after several hours work, unnoticed by the guards, they succeeded in liberating themselves from the cells, and attacked Guard Day as he was patrolling his beat. Guard Hibben, Jailer McMartin and Warden Brynner, hearing the cries of Day as he was being beaten down, rushed to the scene and overpowered Clark, Davis in the meantime having made his way back to the cell.

From information received, it seems that this was not the first time that the two men had shown fight, in fact during their incarceration in the Vancouver city jail, Clark had succeeded in wrenching an iron bar from the cell window, but was discovered in the nick of time.

A few weeks ago both men were drawn on the carpet for violating the prison rules, with the result that they were placed in the solitary confinement cell and supplied with bread and water for a few days.

Warden Brynner says it is a miracle that Guard Day was not knocked unconscious by the first blow administered by Clark, which had it been done, would have given the prize to a chance to liberate many of the other men under guard there, and perhaps to have brought about a wholesale jail delivery.

Guard Hibben was noticed on the street last evening with his head covered with bandages and walking with a decided limp, caused by his scuffle with Clark, on the stairway. Hibben received a nasty crack over the side of the head with one of the iron bars, but the doctor hopes to save the necessity of having to put stitches in which will prevent any scar from showing.

Day, according to the hospital authorities, is slowly recovering from his injuries, although it will be a matter of several days before he is able to leave that institution.

Just what will happen to Clark and Davis is yet uncertain. They are scheduled to appear at the fall assizes to answer a charge of murder, and it is probable that little or nothing will be done to them in the interim. They will undoubtedly be kept closely guarded in separate and doubly strong cells.

CONCILIATION BOARD FOR G. T. R.

Department of Labor Receives Application for Its Establishment—1500 Men Involved.

Ottawa, Aug. 25.—The department of labor is in receipt of an application for the establishment of a board of conciliation and investigation under the Industrial Disputes Investigation act to deal with matters in dispute between the Grand Trunk Railway company and its railway telegraphers, comprising operators, station agents and dispatchers to the number of 1500, employed on the company's entire system. The employees referred to have been in conference with the company for some time past, relative to the adoption of certain wages and conditions of employment.

It is understood that a settlement was reached on some points at these conferences and that the board's applications covers the wage schedule and other matters still outstanding. The application is under consideration by Hon. C. J. Doherty, acting minister of labor.

LONDON MARKET CLOSING STEADY AND IMPROVED

London, Aug. 25.—Money was a shade harder and discount rates quiet today. The continent secured \$1,000,000 and the Bank of England the remainder of the \$4,000,000 South African gold offered in the open market.

Although dealers on the stock exchange were largely occupied with the mining carryover, trading was fairly active and cheerful. Mexican issues hardened and Paris bought diamond and copper shares while a spirit in chartered shares was the feature in the South African section.

American securities opened quiet and steady and during the forenoon advanced a fraction on the light covering. Later the market improved. The closing was steady.

WORD FROM MR. WADE, SR. Following the arrival here of a letter from Palmer, Mass., from the father of Ben. A. Wade, the belongings of the lost man will be shipped east today.

Miss Anna L. Cassidy's belongings will be examined today for the address of relatives.

ADVERTISING RATES on application.

TUESDAY MORNING, AUGUST 25, 1913.

TARDY ACTION.

Word comes from Europe that the powers have decided to investigate the atrocities committed during the Balkan war, a great number of which they might have prevented had they possessed less regard for red tape and more for the preservation of human life.

It is not to be expected that all the tales which were sent out of unbelievable tortures perpetrated on the inhabitants of captured towns were true, but enough has been ascertained to prove that the fight between the allies and the Turks and the more recent campaign of the allies against Bulgaria were marked by deeds that make reports of the happenings of the dark ages look like mild attempts at nastiness.

The powers couldn't interfere, even though hundreds were murdered and outraged weekly, simply because each was too busy watching that the other didn't profit by the trouble in the Balkans. There would have been too many questions of precedence to settle to allow of any effective interference, so the semi-civilized mountaineers were permitted to hack, burn and torture at their own sweet wills, so long as it was done under the cloak of war.

Now there is to be an investigation and, likely as not, there will be no punishments, or if there are, the wrong ones will get the blame.

Noise in the bush sounded queer: 'Nother dead guide taken for deer. The latest example has come from Santa Cruz, California.

The Washington love-lorn swain who sent his best girl a chunk of venison might better have stuck to candy, particularly when the deer season is closed.

Thieves will not do so much house-breaking when people who go away for the summer quit pulling down their blinds as an advertisement that they're not at home.

An Indiana husband of a few weeks has applied for divorce on the ground of extreme cruelty. He didn't mind his wife baking biscuits, but he objected to her forcing him to eat them.

A Salt Lake man blew out what brains he had because his wife's affections transferred themselves, so says a news despatch. And that happened in Utah where wives are the staple product of the country.

The polite children of a few years ago seem to have gone the same way as the parents who taught their offspring to keep their elbows off the table and emphasized the rule of youngsters being seen and not heard.

The daughter of Governor H. Johnson of California is going to take to vaudeville as an oriental dancer. The mystery's solved; now we know why father was so anxious to cut down competition by passing that anti-oriental measure.

Every time Lord Strathcona intimates that he is coming to Canada for a trip the wonderless wire workers fuse the telegraph lines with announcements of his intention to retire from the Canadian high commissionership in London, never seeming to dream that his connection with the Dominion, as its British representative necessitates an occasional jaunt to Ottawa.

ENJOYED HIS TRIP UP THE COAST

Sheriff Armstrong and Family Back From Holidaying in the North.

Sheriff and Mrs. T. J. Armstrong and Miss Armstrong, who have just returned from a trip up the northern coast describes their outing as most enjoyable.

Sailing on the night of August 9 from Vancouver on the C. P. R. boat Princess May, they called at Alert Bay the following day, examining the famous totem poles which are the great attraction of Cormorant Island. On August 11 they called at Prince Rupert, thence to Port Simpson and then to Ketchikan, the first port of entry in United States territory. They stayed there for about three hours and proceeded to Wrangell, at the mouth of the Stikine river. Wrangell is the distributing centre for supplies which are taken up the river to the British interior, the United States owning a strip of land which shuts British territory off from the coast in those regions.

Above Wrangell, on the outward trip, the Princess May passed through Wrangell Narrows, a scene of magnificent beauty, rock and mountain, in picturesque profusion, with light-houses dotted at intervals. Over the hills can be seen the glaciers. It is undoubtedly one of the chief sights of the trip.

On Wednesday, the 13th, the party went up Taku Arm, to the Taku glacier. This extends from the ocean to Atlin lake and is really two glaciers, one that is known as a dead glacier and the other a live one. The distinction lies in the fact that the live one moves, imperceptibly, of course, and throws off icebergs, and the other is stationary. The coloring is marvellously beautiful, deep blue, emerald green and pure white.

To Juneau, the capital of Alaska, where is situated the residence of the governor and the centre of the administration of the territory.

Opposite Juneau on Douglas Island lies the celebrated Treadwell gold mine. The travellers next visited Shakzay, arriving there on Thursday afternoon and remaining until Saturday, August 16. The sheriff and his family transferred at this point from the Princess May to the Jefferson of the Alaska Steamship company and proceeded to Sitka, which proved the most interesting visit of all.

Interesting Sitka. Sitka is situated on the west side of Sitka Island, and is the former Russian capital of Alaska. Here are seen the old Russian warehouses in which were stored the furs traded during the Muscovite occupation, still standing, but much dilapidated. Here also is seen the Greek church, which at the time of the sheriff's visit was receiving a fresh coat of paint.

Conducted by the Greek priest over the sacred edifice, the sheriff had the opportunity of inspecting closely the magnificent paintings which decorate the walls which were brought over from Russia at the time of the Russian domination. The peculiarity of the paintings is that while the head and face of the figure represented are painted as usual in portraits, the clothes and draperies are hammered out in pure silver, a peculiarity which the priest informed the sheriff is never seen outside the Russian empire. The effect is one of great beauty.

In the old Russian warehouse is a curio store or museum. Among other articles exhibited are a number of pieces of furniture which had belonged to the Russian Governor Baranoff during his tenure of office in Alaska.

The lady who owns the furniture will not sell any of the pieces, although she has been offered fabulous prices for them. One Chicago woman endeavored for two hours to acquire a settee and asked the owner to name

her own price, but to no avail. There is a beautiful park at Sitka, with a road running along the side of the harbor, with totem poles from 20 to 25 feet high carved magnificently with the animal emblems of the tribes. Standing at intervals of 500 yards the poles are set in concrete so that their enduring, if not perpetual, is hard to determine.

The sheriff brought back with him a miniature totem pole, exquisitely carved in mastodon ivory, the work of the Eskimos.

LONDON BUSY AT BABY PROBLEM

Healthy Youngsters and How to Bring Them Up Gives Savants Topic of Conservation.

London, Aug. 25.—The great controversy of "healthy babies and how they are best brought up" has been started by a meeting of the conference in London on infantile mortality. The figures adduced by John Burns, M. P., of the local government board, showed that while naturally the purely residential districts show the lowest mortality, the highest and worst figures are supplied by the factories and districts where the women work long and hard. Take, for instance, Battersea and Bursley. The rate of mortality in the latter town is almost double that in the former, and yet each is an artisan district, and the conditions of life, apart from the work in the factory, are very much the same. The difference in home life, of course, is that in the case of the women who work at home or live at home, while in the other they are mostly employed close up to and soon after confinement in factories. Obviously there is something wrong, but nowadays there is less disposition to imagine that it is due to the conditions of feeding as to conditions of employment.

Not Low Wages. Wages are high in Lancashire, much higher than in Battersea, and so it cannot be suggested that the mortality is due to the results of low wages. What apparently is necessary is the better regulation of women labor in factories, and in this connection it may be mentioned that the suffragettes have a large poster out in London this week showing a factory worker leaning at the suggestion that the men are about to take in hand the regulation of women labor, the inference being, of course, that this is a matter which they themselves ought to decide. There is something in this point of view.

But perhaps the most crushing reminder of this official statement is a letter from a colonial resident showing that the rate of infantile mortality is least of all in the colonies where the women do most home work. The stand is taken that there are better mothers there than here, for the results show it.

JORDAN RIVER POWER DAM READY FOR WORK

Victoria, Aug. 25.—With the completion of the great dam which the Vancouver Island Power company has been constructing for the past year at its Jordan river power plant, one of the largest works of its kind in Canada is now ready to fill its part in the development of power for the operation of commercial enterprises in the southern end of Vancouver Island. The dam, which is the highest in any Canada, and has cost nearly three-quarters of a million, will provide storage capacity sufficient to assure an ample supply of water throughout the summer for the operation of the turbines.

The necessity of additional storage capacity became imperative when the company undertook to raise the capacity of the power plant from 12,000 to 32,000 horse power. The work of installing the additional units in the power house has been under way for some months. With this increase in power and the Brentwood Bay steam auxiliary plant of 6,000 horse power in reserve, the company will have ample power to operate the lines of the B. C. Electric company, and meet the remarkable increase in the demand for power for industrial and commercial purposes.

BABIES AND MILK. Saskatoon Investigates Infantile Death Rate.

Saskatoon, Aug. 25.—In an effort to remove all possible doubt as to the part the milk supply of the city is playing in the epidemic of disease prevailing among the children in Saskatoon, the mayor and commissioners will conduct another thorough investigation into the matter.

According to the statement of Mayor Harrison, the commissioners will have samples of the milk being sold by every dealer in the city tested by the city bacteriologist without further loss of time.

Dr. Chapman, acting M. H. O., reported to the council that samples of the milk being sold by the various dealers in the city had been examined and showed there was no reason to connect the city's milk supply with the infantile death rate.

Houses Short There. Cofax, Wash., Aug. 25.—Cofax is confronted by a house famine which threatens to curtail the population of the town. Many families who had planned to come here to spend the winter are unable to get homes and local people are trying to interest capitalists in building more houses.

Houses costing from \$1,500 to \$2,000 rent for from \$20 to \$30 per month and are seldom vacant.

WHEAT FIELD IN FLAMES. Dayton, Wash., Aug. 25.—While the 174-acre field of wheat belonging to J. E. Barr of Whistler creek, in Columbia county, was being harvested a spark from the engine of the threshing set fire to the grain. Rapid work cut off the damage to about 17 acres.

Good Galena Showing. Kaslo, Aug. 25.—Splendid progress is being made upon the development of the Revenue, a South Fork property recently bought by a Calgary syndicate, headed by R. G. Farnes, of that city according to information brought down from the hills by Lachlan McLean, who is associated with Scott Thornburg and Thomas Melrose as one of the former owners. A splendid showing of galena is being opened up and as development is proceeding this ore is being taken out and sacked for shipment to the smelter. The ore is a good shipping grade and the Revenue has the ear marks of being a clean-cut mining proposition that will ultimately assist greatly in the bringing of the rich South Fork section to the prominence that the district deserves.

CHANGE IN BURNABY FINANCIAL MATTERS

In a Public Letter Ex-Reeve Weart Disapproves Arrangement of Reeve McGregor.

Edmonds, Aug. 25.—The Burnaby financial situation took a fresh turn Saturday, when it became known that ex-Reeve J. W. Weart, who stepped out of office last January, had come out in the open in his disapproval of the arrangements made by Reeve D. C. McGregor, as regards the financing of the municipality during the present stringency in the money market.

Mr. Weart's letter, which was published in yesterday's issue of The News, came as a surprise to many of the residents, though it is well known that despite the fact that he does not hold office, he still maintains an interest in municipal affairs and Dame Rumor connects his name with future political work in Burnaby and District.

When seen yesterday Reeve D. C. McGregor had little, if anything, to say in answer to Mr. Weart, although he intimated that some misrepresentation had crept in, which he thought would be explained to the ratepayers on Wednesday evening at the Burnaby public hall. So far, Councillor Macpherson is the only opponent in the council of the by-law which is to be voted upon Saturday.

Interviewed by The News, Reeve McGregor, who was on a six days' leave from the Nanaimo strike district, said he would not at that time discuss Mr. Weart's letter. He might have something to say on the matter later, but until he had talked it over with his confederates in the council he would prefer to say nothing.

The present situation leaves the question an acute one in Burnaby, for it is plainly stated that unless further arguments are advanced in favor of the by-law, a considerable opposition will develop which might handle the proposed bond issue in the same way as the waterworks by-law was treated earlier in the year.

HELPED TO FORM IT FIFTY YEARS AGO

Baynes Reed, of Victoria, Will Attend Etomological Society's Jubilee at Cuelgh

Georph, Ont., Aug. 25.—On Tuesday, August 27, a somewhat remarkable assembly will meet at the Ontario agricultural college, Georph, when the Etomological society of Ontario holds its fifth annual annual meeting, at which a number of Etomologists are expected to be present. Efforts are being taken to make the occasion as representative as possible, and scientific societies and institutions in many parts of the United States and Great Britain are sending delegates.

Three of the charter members are still living and engaged in active work, these being the president, Professor C. J. F. Bethune, of the agricultural college; Dr. William Saunders, who established the experimental farms of the Dominion, and E. Baynes Reid, of Victoria, B. C., who has in charge of the meteorological office here.

The universities of Edinburgh and Manchester will be represented by delegates, as will also the natural history department of the British museum, the venerable Linnean society of England, the Etomological society of London, and the Etomological society of South London.

B. C.'s Representative. Edmund Baynes Reed, one of the small band who founded the Etomological society of Ontario in 1863, came to London, Ont. from England as a young man, and during his leisure moments devoted much of his time to the collection and study of insects. He and Dr. Saunders were instrumental in forming the London branch of the society and keeping up the enthusiasm of its members. When the headquarters of the organization were removed to that town, Mr. Reed took an active part in everything that was done, and gave most material help in the formation and increase of the library and collections, being secretary-treasurer of the society from 1871 to 1873; vice-president in 1874, 1877, and from 1877 to 1889; a member of the council from 1874 to 1875, and from 1878 to 1879; and during many of these years librarian and curator in addition.

On the occasion of his departure for British Columbia in 1890, the society regretted as the removal from Ontario of so valuable and important a member. Mr. Reed, a comprehensive list of whose works were referred to in a leading article published at the time in the Canadian Etomologist. It was owing to the interest and original observations made by Mr. Reed in London that he was selected to take charge of the Pacific coast division of the Dominion meteorological service, with headquarters at Victoria, an office which he still holds.

ORIENTALS BARRED FROM PROVINCE

Mass Meeting Likely to Be Held in Victoria to Discuss Movement For This Action

Victoria, Aug. 25.—That the total exclusion of Orientals from the Dominion is necessary for the peace and well-being of the country, and that their presence in this country especially is a menace to the white race and detrimental to the progress of British Columbia, was again affirmed in a resolution adopted at a well-attended meeting of the Asiatic Exclusion league held in the Liberal rooms Thursday evening.

Having set forth these matters the resolution called upon the federal and provincial governments to do all that was in their power to prevent the entry of any more of the Asiatic peoples to province or Dominion.

In the course of the discussion of this resolution it was estimated that there are in the province 40,000 Chinamen alone, of whom 10,000 came in last year and no less than 819 in the month of May last. That these people are coming in at a more rapid rate than ever before was stated by several of the speakers and the figures of the immigration department were quoted as authority for this. In addition to the Chinese, the presence of Japanese was referred to and the evident desire of more of that race to get in was shown in the recent attempts to smuggle men. Reference was also made to the incursion of Hindus and the likelihood that the establishment of a direct steamship line to India would lead to a large influx of that race to this province.

It was pointed out by some of the speakers that if there were no Orientals in the province, the places now occupied by these races in domestic service and in industrial and agricultural pursuits would be in the hands of whites and that the stage of advance of the province, would be greater than it is if that had been the case. That there was no saving to the employer in most cases by the demand of the yellow men for a wage as large as given to the white man was asserted, while on the other hand the laborer even was not as efficient or faithful as would be given by a white man or woman.

There was some discussion as to holding a mass meeting of citizens to voice the feeling of the people of this city and adopt resolutions in the matter, and this will be taken up at a meeting of the executive committee.

VICTORIA PIONEER IS DEAD AT HIS ISLAND HOME

Victoria, Aug. 25.—One of the oldest residents in the district of Victoria passed away on Thursday at the family residence, Lake Hill farm, Swan lake, in the person of Mr. Robert Gregory MacKenzie, the last surviving son of the late Kenneth MacKenzie, who came to Victoria in 1853.

Robert MacKenzie, who was born in Victoria 56 years ago, had lived here practically all his life, and was well known and highly esteemed throughout the whole of the island, particularly by all the old timers. The family at first lived in the Hudson's Bay fort, when there was but one house outside the palisades, later removing to Craigflower, the birthplace of the late Mr. MacKenzie. Many years ago they removed to the Lake Hill farm, which had formed the family headquarters ever since. The deceased was the youngest of four sons, being predeceased by his three brothers. Two sisters, Miss Agnes MacKenzie and Miss Wilhelmina MacKenzie, survive him at the family home, in addition to his wife, to whom he was married eleven years ago while two pieces, Mrs. Craft of California and Mrs. Herbert Keith, also of Victoria, also of Victoria, are the more immediate relatives of the family.

Mr. MacKenzie has been in ill health for more than a year, and visited for some months in California last winter in the hope of regaining strength, but returned to his home at Lake Hill farm little benefited, however. The deceased gentleman had a wide circle of friends by whom his loss will be felt as a personal sorrow, and to the family sympathy is extended in their bereavement. The funeral will take place on Tuesday afternoon from the late residence to St. John's church where services will be held at 2 o'clock, after which the remains will be taken to the B. C. funeral parlors pending the erection of a family vault.

THE WORLD'S WORK DEPENDS ON THE WORLD'S DIGESTION

From the captain of industry to the hod carrier—from millady in the auto to the woman with the scrubbing brush—the accomplishments of every one of us depend absolutely on the accomplishments of our stomachs. Backed by a good digestion, a man can give the best that is in him. When his stomach fails, he becomes a weakling.

To this loss of power no one need submit. Right habits of eating, drinking, sleeping and exercise, aided by Na-Dru-Co Dyspepsia Tablets, will restore and maintain the full efficiency of the human mind and body.

Na-Dru-Co Dyspepsia Tablets contain the active principles needed for the digestion of every kind of food. They go to the assistance of the weakened stomach, and enable the sufferer, right from the start, to assimilate and get the benefit of the food. With this assistance, the digestive organs regain their tone, and soon the use of the tablets is no longer necessary.

If your stomach is not working properly, try Na-Dru-Co Dyspepsia Tablets, 50c. at your druggist's, National Drug and Chemical Co. of Canada, Limited, Montreal.

COAL MINING RIGHTS OF THE DOMINION in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2500 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated such returns shall be furnished at least once a year.

The lease will include the coal mining rights only, but the lease will be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands, W. W. CORY, Deputy Minister of the Interior, Ottawa. Unauthorised publication of this advertisement will not be paid for.

WHY BUY FOREIGN CEMENT

when you can get as good, or better, manufactured in B. C., viz.: the celebrated "VANCOUVER" Brand, guaranteed to pass Standard Specifications of American and Canadian Engineers' Association.

We would also call attention to our Vitrified Sewer Pipe from 4-in. to 24-in. in diameter. This is also made in this Province and we consider superior to any imported article.

We also carry a stock of Crushed Rock, Washed Gravel, Sand, Lime, Plaster, etc.

See us before ordering elsewhere.

AMERICANS EXPECT BEEF FROM CANADA

New Tariff Will Give Dominion Big Market Across Border—Too Soon to Take Fright.

New York, Aug. 25.—That the realization of the serious conditions of feed crops has led to what may prove to be an unnecessarily frightened condition of the public mind with reference to the shortage of beef and of other meat supplies is the opinion of some of the packing interests, says the Wall Street Journal. Brought and the decrease of corn and of oats for the current crop will undoubtedly affect the hope of increased livestock, and of reserves with which to fatten them. But other conditions may in the coming months restore the balance of untoward factors and ease the fear of the fact of high prices for meat.

Speaking of present dearth of cattle reported from the western centres of stock receipts, one of the leading men connected with the United States interests said: "In spite of the statements predicting that the retail prices of beef will go to unheard-of prices this winter, I do not think that meats in general will soar to prohibitory prices. There may be a very noticeable increase in the price of fancy cuts. As the top prices of meat are always those heralded as representing the average of prices, the public easily becomes anxious as it reads of higher costs for those rather restricted demands for meat."

Too Soon to Take Fright.

"It is too soon to take fright at possibilities which may not be realized. Taking the average of all cuts at the present prices of dressed carcasses, they run from \$12.50 to \$15.00. A year ago the average price was one-half cent a pound more. Notice, however, that the receipts of cattle are causing a temporary drop in the price of beef whether for fattening or for beef purposes. Fat cattle brought \$10.40 per hundredweight a year ago at Chicago and are now \$9.40. There is considerable margin left yet. The very fact that cattle are being rushed through the usual packing centres for

fattening purposes is a possible protection for the future. At present it adds to anxiety, and also lessens actual supply for meats.

"Killing of corn and of hay has caused the farmer to sell his stock, as lack of corn and actual want of water, and the drying of pasture have forced him to part with his stock now. It means much less to him when everything was promising for the increase of cattle supply. It is possible that the attempt of the banks to carry the farmer through the droughts so as to conserve his stock will allow him to stand the cost of importing corn during the coming season. But even then, and granting higher prices, the profits will be small. And this at least looks like higher prices on a steadily rising basis."

The New Tariff.

"Yet what are the correctives to this situation? The new tariff with its free beef will at least temporarily give some relief to cattle stringency. Canada with much profit to itself can furnish a good deal of meat. Although the type of Mexican cattle is distinctly inferior, yet fattened the Mexican cattle can supply fat meat. Undoubtedly, also, after the tariff bill is passed, meats will be imported in large quantities from Australia, which is in a position to supply large amounts of mutton, and from the Argentine. These importations will serve as a check, certainly for a time, to too great a rise in the cost of meats here. It would seem wiser for the public to await more fully the results of present fears before a wave of anxiety reacts upon the remaining supplies in the hands of the farmers who will be tempted to sacrifice their stock."

"On the other hand, it must be recalled that to the large packing interests it makes little difference what restrictions the importations may cause. Their position is assured. They practically control the source of supply the world over. This self-interest of the packers gives encouragement that there will be no spectacular advances in prices. But it is probable that pressure of demand will prevent, for years to come, any hope of material lessening of present prices."

BACK FROM WALKING

TOUR IN JAPAN

Victorian Hoofed It Through Mikado's Domain—One Other Canadian With Him

Victoria, Aug. 25.—There is something infinitely alluring in the idea of a walking tour through Japan, the land of romance, the precocious child of the great far east. To tramp all day amongst some of the most magnificent scenery in the world, amid the scent of mulberries and swaying medlars; to blaze a steady trail where mountain alternates with valley and where climatic agencies have smoothed and modified everything rugged or abrupt until an impression of undulation rather than of grandeur is suggested; and at evening time to rest in some quiet inn of an old-world town where the fret and hurry of modern civilization have never reached—must be to the traveller a journey to be remembered forever.

Such has been the pleasant experience of Lindley C. Crease, the well-known Victoria barrister, who has just returned from a tour of this kind through the land of the Rising Sun. Mr. Crease started from here early last June and stayed two months. During that time he set out to walk across the country with the idea that to see a little of a place well, is better than to see much of it badly. He was accompanied by a single companion in the person of Captain Kauback, a Canadian like himself and an adjutant at Kingston.

Not Ordinary Traveller.

It was not as an ordinary traveller that Mr. Crease went through the country; but as one who takes a deep interest in the sociological as well as the scenic side of the trip. A keen observer, some of his impressions of this remarkable people are extremely interesting at a time when their presence in this country is the subject of so much debate, and about whom, in spite of their permeation of the Pacific coast, the average Canadian knows so little.

Mr. Crease is evidently a firm believer in the motto which advises, "When in Rome do as Rome does," for during his stay in Japan he did not frequent the European hotels and inns, choosing rather to put up at the native hosteleries and eat the native fare in order to get a deeper insight into the customs and manners of the people. This while it resulted oftentimes in a certain amount of inconvenience and a little unpleasantness, amply repaid the traveller in the impressions he was able to carry away.

DESIRES DIVORCE AND MUCH MONEY

Mrs. Williamson, of Spokane, Wants Separation and Cool Million From Her Husband

Spokane, Aug. 25.—Charging that her husband, Vaneley D. Williamson, one of the wealthiest mining and realty owners in Spokane, treated her in a cruel manner and deserted her, Mrs. Mabel C. Williamson began a divorce suit in the superior court yesterday. She asks approximately half of her husband's estate, which she values at \$1,000,000.

Mrs. Williamson, who is the daughter of J. Lamont Cutter, of Denver, announces in her complaint that her husband is subject to fits of passion, and that he abused her prior to the time he deserted her on April 27, 1912. They were married in 1904.

She alleges that she did not know her husband was a divorced man at the time she married him, but declared that she has found by the records that Mr. Williamson was divorced by Caroline H. Williamson Jan. 30, 1897. She declares that up to the time that they were married that her husband had led her to believe that Caroline H. Williamson had died.

Mrs. Williamson declares that much of the community property is in the name of the Williamson Investment company, which is made a party to the suit.

Mr. Williamson is a native of Oakland, Ore., having been born in July 1865. He removed to Washington and engaged in the general merchandise business in Sprague in 1883.

He was one of the first men to reach the Coeur d'Alene district when gold was discovered and not only aided in developing mines, but assisted in laying out the town of Burke, Idaho. He has been interested in South African, Mexican and Alaskan mining properties since aiding in developing work in the Coeur d'Alenes.

He was a stock holder in the Oregon Trust railroad, but sold out his interests to J. J. Hill. Recently he had devoted much time to Spokane realty.

To Make Patent Brick

Vernon, Aug. 25.—The latest industry to be established in the B. X. valley is the brick manufacturing plant erected at Nell & Cryderman's gravel pit on the B. X. road by the Vernon Brick company. This company was organized this year by a number of Vernon capitalists who have secured the working rights of a new patent process of brickmaking which was illustrated practically in the city some weeks ago and pronounced a decided success. Cement, sand and gravel are the main constituents employed. A commodious building about 40x30 feet has been constructed and the machinery is being installed. The location is an ideal one so far as raw material is concerned, there being an almost inexhaustible supply of sand and gravel at hand. The improvements being made on the city streets will facilitate the haul of cement to the plant and of the manufactured brick to the city for use there or for shipping to outside points. An ample supply of water can be had from the B. X. creek or by connection with the city water system. It is expected that the plant will be ready for operation in a week or two.

PORTLAND FOREST FIRE NOW UNDER CONTROL

Portland, Ore., Aug. 24.—A forest fire which has been burning for three days near Marshland, in Columbia county, is now under control and confined to an area of 150 acres.

State Forester Elliott, who visited that section Saturday, declares that when he left there was no further danger, unless a high wind should spring up, but three wardens were left in charge and upwards of 100 men are still fighting the fire.

A fire line was cut around the area in which the fire was confined and to which the loss will be limited unless it should break out afresh.

The Sale of the \$140,000 Stock of Lees Ltd. Is now In Full Swing

The Store is thronged with crowds of eager buyers, each and every one anxious to secure their share of the wonderful bargains we are offering.

This is a sale where every article offered is a special—not a few items thrown out for leaders but the whole of this enormous stock of reliable and dependable merchandise is selling at less than manufacturers' cost.

The above statement is no idle boast. A look over our stock and prices will convince you more than pages of advertising. All goods marked in plain figures, the original price ticket remains on all articles.

Fresh Water and Salt

WESTMINSTER PORT PACIFIC COAST

SOME CANNERIES PAYING 20 CENTS

Sockeye Prices Go Up Following the Prevailing Scarcity—More Humpbacks Being Taken.

Apparently the sockeye season of 1913 is no more, for yesterday's catches were poor, not only in the Fraser, but outside and down the strait as well. Although more men put out from the local waterfront fewer fish were taken than during the past three or four weeks.

It is noticeable the humpbacks are working farther toward fresh water almost every day now, and because of this, probably, the price of sockeyes has been raised by many canneries to 20 cents per fish.

The B. C. Cannery's association report as follows:

Bellingham canneries got large quantities of salmon, but they were nearly all humpbacks.

Anacortes also got large quantities of salmon, but nearly all humpbacks. The fishing on the lower Fraser and Clatsop was disappointing.

Deliveries at all the canneries being very small, in some cases only 200 or 300 fish. The north arm proved better, and the plants will be able to work full time today. The up river boats were reported doing poorly, but the wires being down no definite reports available. A number of canners raised the price of sockeyes to 20 cents last evening.

The Samson went out yesterday and after doing some snagging came back to the D. P. W. wharf at night.

The vessels passing through the draw at the Fraser river bridge yesterday were: Beaver, up; Clansman, up; Transfer, up and down; Flyer, with mud dredge, down.

The steam freighter Edith, of Seattle, Captain C. W. Call, yesterday unloaded some of the heavy dredge machinery she brought for the city harbor dredge.

Captain Rogers, of the King Edward, who was in town over the week end, has returned down river to his vessel.

Seventy-eight days out. The French bark Jean has reached the Columbia after a voyage of 78 days out from Buenos Ayres. The vessel is under charter to H. M. Houser to load wheat for the United Kingdom. The same course was covered last season by the British ship Colmar in 75 days. The Jean is an old trader on this coast.

Big Tanker Needs Repairs. It is reported that the new oil tanker San Fratino, of 15,000 tons carrying capacity, constructed by Messrs. Swan, Hunter & Wigham, Newcastle, Ltd., Wallsend, to the order of the Eagle Oil Transport Co., is to be repaired at Wallsend by her builders. The vessel has been ashore on the Mexican coast.

Lightship Ordered. Messrs. Bow, McEachan & Co., Paisley, have received an order from the Canadian department of marine and fisheries for the construction of a steel screw lightship 134 feet in length.

LUSITANIA RESUMES AFTER OVERHAULING. Liverpool, Aug. 25.—After being out of commission since the latter part of December, the Cunard liner Lusitania is again ready to take her place on the service, and will, under present arrangements, sail from the Mersey for New York toward the end of August. During the eight months that the Lusitania has been berthed at Liverpool every part of the huge liner, external and internal, has been thoroughly overhauled and she will be at the time of her departure in an excellent condition as she was when first placed on the service.

ENDS LONG TRIP. New England Fishing Schooner Makes Port Townshead. The auxiliary fishing schooner Knickerbocker, first of two vessels of her type constructed for the New England Fish company, at Boston, is reported to have reached Port Townshead after a voyage of about six months from the Atlantic.

The Knickerbocker will engage in halibut fishing out of Vancouver. The schooner left Boston on March 24, and was reported from Punta Arenas in the Straits of Magellan, on May 24. The auxiliary engines broke down and the skipper was compelled to sail his small craft the rest of the way. The schooner is built along the lines of the Gloucester fishing craft and is a very handy vessel under sail.

She has powerful auxiliary gasoline engines and after being fitted for Pacific coast fishing on Puget Sound will proceed to Vancouver to ply from that port.

The second schooner, the Bay State, will leave Boston shortly for the coast.

TIDE TABLES—FRASER RIVER. For the Week Ending August 31. Westminister. Sand Heads.

WHAT FOOLS SOME PEOPLE BE, SURELY

London Crowd's Actually Cheer Jack Johnson in Theatres There—He Makes Nice Speech.

London, Aug. 25.—Jack Johnson, negro pugilist, says that he is going to appear at the public music halls, where he is billed for two days, to find if the public want him to show if they do, he will fill his engagements.

He entered a box tonight at Euston theatre of varieties and was loudly cheered. Two performers, who had taken a prominent part against Johnson, in the controversy that has been waged over his promised appearance were unable to finish their turns, owing to demonstrations in his favor.

Johnson from the balcony addressed a great crowd outside the Euston theatre, thanking the people for his kind reception and asking for fair play. He visited a South London music hall where he had previous engaged to appear, and occupied a box. He was greeted with cheers and addressed the audience in similar tones from the box. Only a few cries of dissent were heard.

Social and Personal

Mrs. Herrmann and family, Austin road, Burquitlam have gone to Crescent for a holiday.

Councillor and Mrs. T. W. Mayne, of Burnaby, left yesterday for a trip to the east. They will return by way of California.

H. D. Bourke, of Lulu island, entertained friends at dinner last night upon the occasion of the christening of his young son.

The St. Mary's church choir, Sapperton, and the Women's auxiliary paid a visit to White Rock on Saturday and were hospitably entertained by Mrs. Nels. Nelson.

MONTREAL STOCK MARKET DULL AND FEATURELESS

Montreal, Aug. 24.—Trade on the local stock exchange maintained a good undertone today, but business was very dull and apart from rallies in Spanish River and MacDonald, both of which showed improvement under what was reported to be Toronto buying, there were no features. Spanish River preferred, which could find no buyers on its perpendicular drop of 2 1/2 points last week, responded easily to a light demand today, rising 10 points to 60 and closing that price bid on transactions in less than 75 shares. Sellers were asking 70 at the close. Spanish River common recovered 3 1/2 to 20 1/2 and finished 3 1/2 up on the day. MacDonald rose to 28 and after slipping off to 27 1/2 closed 27 5/8 bid.

PREPARES TO BUILD. Government Getting Ready for Work at Sidney.

Sidney, V. I. Aug. 25.—W. F. Teetzel, of the Dominion public works department, visited Sidney last week for the purpose of looking over the proposed sites for the new public building to be erected in Sidney by the Dominion government. Mr. Teetzel will recommend one of these sites to his department and in all probability the erection of the new structure will be commenced in the near future.

This event was foreshadowed in an interview with Mr. Shepherd, the local member, in which he spoke of the speedy arrangement made by the government for a Dominion public building in Sidney, and for which a handsome appropriation was made in the estimates during the last session of parliament. Its erection on Beaufort avenue, somewhere between First and Fifth streets, will give an air of substantiality to the present business houses and will be the means of keeping this section in a compact space, as it is a well known fact that the post office alone in almost any growing town is considered the centre and around it cluster stores, offices and business places of all kinds.

At the Theatres. TRIO OF ATTRACTIONS. Heller, the hand and ankle expert, mystified many people at the Royal theatre last night. He bars no handcuff or shackle that any one will produce. Tonight will be his last night in town and at noon today he will make his sensational dive into the Fraser river, at the foot of Sixth street.

There was considerable voting in the baby contest last night and the results will be shown in front of the theatre today and every day during the week. "The Riot" is the name of the most laughable Keystone comedy ever turned out by this firm of comedy film makers. It caused one continuous roar of laughter and applause from the start to the end of the reel.

There will be an entire change of program on Wednesday, featuring Karl Karey, one of the most accomplished singer and musician that ever appeared here.

BILLY "SINGLE" CLIFFORD'S PAST (BELIEVE ME) Billy S. Clifford, the American actor, while in England, was invited to spend a week-end in the country by a distinguished and elderly duchess, who rather patronizes Americans.

After Clifford had arrived and had been shown to the great hall, his hostess came in. "Oh, Mr. Clifford," she gushed, "I am so glad, so very glad to have you as my guest! You see I love Americans, and I know all about you. Oh, indeed, yes I do—I know all about you."

Clifford looked around apprehensively. "If that's so," he asked, "how did I get in?"

Mr. Clifford will be seen in "How to Live" at the opera house on Wednesday and Thursday evenings next. Seats are now on sale.

WESTMINSTER OPERA HOUSE HARRY TIDY, Manager. WEDNESDAY AND THURSDAY EVENINGS NEXT August 27th and 28th BILLY "SINGLE" CLIFFORD Presents himself in "Believe Me" A Merry Musical Stampede, Bubbling over with Mirth and Melody. An excellent cast of dainty divinites who sing, dance and delight the eye. Beautifully costumed and properly presented. PRICES: 50c. TO \$1.50. Seats on sale now at Tidy, the Florist's, Phone L184.

WALL STREET WAITS WILSON'S MEXICO TALK New York, Aug. 25.—There was no expectation that today's movement in the stocks would reveal any definite conclusions on the part of the professional traders, who have taken almost exclusive charge of the market lately. The relations between this country and Mexico are recognized on every hand as the most important factor in the present situation and there was a strong inclination to make commitments pending the expected publication tomorrow of President Wilson's message on the subject. Trading was on a limbo scale and price movements were not large, final figures showing no change as much as a point on the day in more active stocks.

Idaho Town Has Heavy Court List for August. Granville, Idaho, Aug. 25.—With a sensational murder trial, founded upon the mysterious shooting of a rancher from ambush as its principal card, the calendar for the August term of the district court in Idaho county, which convened here today, will present what is expected to prove the most interesting court session in the history of the county.

The calendar includes 75 cases, six of which are in the criminal column. The murder case is that of James Dearing, the 23-year-old young man who is charged with murder in the first degree for the alleged killing of his uncle, George Dearing, at Mount Idaho, about three miles east of Granville, June 19.

On the civil calendar are 12 divorce cases and a single breach of promise suit. Some of the charges embraced in the divorce cases are unusual in the extreme. The breach of promise suit, it is said, does not promise much for the morbidly curious, as it is currently reported that one of the parties in the case has left the country.

Another British vessel that has been given up for lost is the British steamer Wyneric, which sailed from Baltimore on April 5, for Guaymas, and since leaving Barbados April 15, has not been heard from. The Wyneric is a vessel of 3141 tons net. She is insurable at Lloyd's and has for some time been posted as missing.

NO MORE FOR WYNERIC. Another British vessel that has been given up for lost is the British steamer Wyneric, which sailed from Baltimore on April 5, for Guaymas, and since leaving Barbados April 15, has not been heard from. The Wyneric is a vessel of 3141 tons net. She is insurable at Lloyd's and has for some time been posted as missing.

THE AMERICANA IS NOW 172 DAYS OUT FROM SYDNEY, AND IS PRACTICALLY GIVEN UP FOR LOST. The schooner Americana is now 172 days out from the Columbia river for Sydney, and is practically given up for lost. The barkentine T. P. Emigh has arrived at Adelaide 119 days out from Port Townshead. The passage of the Emigh is an exceedingly long one compared with similar voyages and when it is considered that the Americana is out 49 days longer than the Emigh, little hope can be held out for her.

THE AMERICANA IS OWNED BY THE PACIFIC SHIPING COMPANY OF SAN FRANCISCO. She was built in Scotland in 1892.

NO MORE FOR WYNERIC. Another British vessel that has been given up for lost is the British steamer Wyneric, which sailed from Baltimore on April 5, for Guaymas, and since leaving Barbados April 15, has not been heard from. The Wyneric is a vessel of 3141 tons net. She is insurable at Lloyd's and has for some time been posted as missing.

LOCAL MEN TO FINANCE PRO. HOCKEY TEAM

(Special to The News.) New Westminster will have a professional hockey team in the Pacific Coast league second to none this coming winter, managed and financed by local capital.

We will have ice by Thanksgiving day and with the boys playing on their own ice there will be no repetition of last year's work when the team had to journey over to Vancouver every day in order to train.

OPINIONS ON LAST WEEK'S BALL GAMES

Although the Northwestern race is by no means over, unless the Vancouver take one awful slump, they look good to repeat their success of 1911 when they won the pennant.

The White Sox have been doing nicely, with good box work to steady them. Boston, after getting a hard knock by the loss of the final game in St. Louis and three running in Chicago, swept the Cleveland grounds clean in the series.

LOCALS WIN

Victoria are winning their games simply by hitting hard and often and do not appear to be dangerous in the race.

LOCALS WIN

In First Day at Victoria New Westminster Cricketers Make Brilliant Showing.

Seattle should take a majority of the series against Tacoma, while Portland can be expected to break even with Vancouver this week.

Nanaimo, Aug. 25.—Playing against Nanaimo, one of the strongest teams on the island, the New Westminster C. C. opened its week's session at cricket here this morning by getting away with a brilliant victory.

The break in the Philadelphia spurt, which practically put Doob's men out of the running in the National league race, began with the appearance of Chicago on the Quaker field.

At Cleveland, the Clevelanders, assisted by a quintet from the bat of Bartlett, soon passed the Islanders total while Wells, d'Easum and Hebron sent things along in great shape to make a victory emphatic.

Meanwhile Chicago, moving over to New York, fell victim to the renewed vim of the Giants and dropped the entire series, enabling the McGrawites to round up their week successfully and with their lead strengthened almost to the point of impregnability.

At St. Louis, the Cardinals, however, at this juncture resumed Philadelphia's humiliation, cleaning up a three-game series that ended Saturday.

The second division teams also had a tight little time of it; Cincinnati gaining ground rapidly; St. Louis falling off precipitately, and Brooklyn and Boston about holding their own.

At Philadelphia, the Philadelphia catching problem became so serious with Lapp, Thomas and Schang all laid up, that the veteran first baseman, Harry Davis, had to go behind the bat for a time on Saturday.

Part of Cleveland's lapse has been due to failure of the boxmen to pitch up to their previous standard, and lack of pinch hitting power among the batsmen.

Washington is pressing the Naps for second position now, only 20 points separating the teams. From its pitching good ball again and Boehling after losing four in a row when his winning streak of 11 was broken, came through with a victory.

SOME LOCAL BALL PLAYERS AT BIG LABOR DAY GAME

Although an alleged line-up of the New Westminster team, which is to play North Vancouver on Labor Day at 10 a.m., has been published without proper authority, it is now announced that the line-up of the local team has not been absolutely decided upon, because a few of the players have not been able to give satisfactory answers to the request for their services, but beyond a doubt the following will bear the banner of New Westminster on to victory on Labor Day: Larkin or Horne, pitcher; Huhnke, c; Marmont, 1b; Silver or J. Gay, 2b; Chaput, ss; Weingartner, 3b; Mallen, lf; Williams, cf; Winblad, rf.

WANT REAL MILL

Local Fans Want a Better Fixture Than Campbell and Ritchie for Labor Day.

Unless the fight promoters succeed in securing a better opponent than Ray Campbell, of San Francisco, to clash with Willie Ritchie at Brighthouse on Labor Day there will be few fans who will make the trip, even though the prices are considerably reduced.

Baseball Results.

Table with columns: Team, W, L, Pct. Northwest League: Vancouver 77 55 .583, Portland 71 55 .563, Seattle 71 63 .529, Victoria 64 70 .477, Tacoma 59 76 .437, Spokane 55 76 .419.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for City and District of the North Arm of the Fraser River, B.C." will be received at this office until 4:00 P.M. on Tuesday, September 30th, 1913, for the construction of City and District of the North Arm of the Fraser River, B.C. Plans, specifications and forms of tender obtained at this Department and at the offices of C. Worsfold, Esq., District Engineer, New Westminster, B.C.; W. Z. Earle, Esq., District Engineer, Winnipeg, Man.; J. S. MacLennan, Esq., District Engineer, Victoria, B.C.; J. L. Michaud, Esq., District Engineer, Port Office Building, Montreal, P.Q.; J. G. King, Esq., District Engineer, Confederation Life Building, Toronto, Ont.; and on application to the Postmaster at Vancouver, B.C. Tenders not to be considered unless made on the printed forms supplied and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature of the nature of the occupation, and place of residence of each member of the firm must be given. Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to five per cent (5%) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fails to complete the work contracted for. If the tender is not accepted the cheque will be returned. The Department does not bind itself to accept the lowest or any tender. By order, R. C. DESBROUERS, Secretary, Department of Public Works, Ottawa, August 18, 1913. (1937)

LAND REGISTRY ACT. Re Lots 602, 604, 605, 606, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631 of Lot 278, Group 1, Map 114, in the District of New Westminster, Port Moody, British Columbia.

Woman as Bootlegger. Wenatchee, Aug. 25.—The new liquor ordinance was given a test today in police court. After Mrs. Wilhelmina Metcalf, arrested for the fourth time for bootlegging, was convicted of selling beer and fined \$100 and costs. City Attorney Kemp and Deputy E. L. Baker filed a second complaint, namely, keeping a place for illegal sale of liquor. The ordinance makes this offense a misdemeanor punishable by fine and imprisonment. It was a complete surprise both to Judge McCoy and the woman's attorney, Ira Thomas. Both acknowledged their unfamiliarity with the new ordinance.

DRUNKEN HUSBAND STEALS MONEY FROM HIS WIFE. Toronto, Aug. 25.—While Frederick Sandford, 1511 Bathurst street, slept a drunken sleep in the cells at Claremont police station his wife lay on the couch in the front part of the building in an unconscious condition. It was the result of Sandford's conduct that the woman had to be removed to the hospital, where she is in a critical condition, as the result of a nervous breakdown, while Sandford is locked up behind steel bars, first on a charge of being drunk and then accused of stealing \$4 from his wife.

Land Slide in Orchard. Vernon, Aug. 25.—Much sympathy is felt for G. Geer of the Cozy Corner ranch, who had the misfortune to lose a number of the young trees owing to a land slide which wiped out a portion of his orchard. He, however, congratulates himself on the fact that it might have been worse.

SMUT IN WHEAT IS DANGEROUS

Likely to Start Fire on Short Notice—Extreme Caution is Required.

Moscow, Idaho, Aug. 25.—Smut is found in the wheat since threshing started Monday in this neighborhood to such an extent that it makes the operation of separators extremely dangerous. A number have already blown up or exploded and two have been burned this season. The Girard, Anderson & Nicholf outfit was practically destroyed yesterday and the sack sewer was reported badly burned. The Crane & Andrews separator was also reported destroyed by a smut explosion.

Edward Snow, of Snow brothers, large land owners and farmers, four miles south of Moscow, who are harvesting their 600-acre wheat crop, report smut as being worse than usual in this country.

THE RESPONSE to the governor's call throughout the rural districts was noteworthy. In Cape Girardeau county, in southeastern Missouri, 2,500 men worked on the roads and every district was organized. The road work here is to be permanent.

Greatest Day in Life. "It has been one of the greatest days of my life," said Governor Major. "As a boy I traveled over nothing but bad roads. I made up my mind then if I could for better highways. The governor of Arkansas has notified me he has set aside September 2 and 3 for road work, and I am happy at the results."

Intend to fix two road days when I return home," said Gov. Hodges of Kansas. "It is remarkable how many have responded to Gov. Major's proclamation."

Reports from every county in this part of the state told of throngs of workers, many of them encouraged by the presence of their wives and daughters, who served dinner.

Quebec, Aug. 24.—Sir Gilbert Parker, novelist and M. P., who arrived here from England August 14, is spending a week at Murray Bay before going west.

In an interview Sir Gilbert expressed the opinion that the entente cordiale between Great Britain and France would prevent a European war. With regard to the naval question, he said the people of the old land felt sure that Canada would take an honorable part in the defence of the empire.

Saying that he was a boy when he left Canada, Sir Gilbert remarked that the situation of Canada in world politics, and, therefore, could not express any opinion on the subject now. He would only speak of them in the British parliament.

Speaking of Canadian debentures and flotations, Sir Gilbert said the situation of Canada in world politics, and, therefore, could not express any opinion on the subject now. He would only speak of them in the British parliament.

Referring to the close of the Balkan war, he said the financial situation will improve, but the American financial situation is not so bright. He said that what lengthens the government's interference or regulation of finance will be carried, will have a powerful effect in distributing the finances of the world.

Sir Gilbert expressed how highly he thought of the honor of Laval university, a French-Canadian and Catholic institution, had bestowed on him last year, when it conferred the degree of D. C. L. on him.

Sir Gilbert remarked that while not actually going out of his way in search of copy, he hopes that his visit will supply him with fresh inspiration, and that he will gather new material for other novels. At present he has two more Canadian novels almost completed. One has a French-Canadian setting. The other treats of life in the Far West. "So you see," said the author, "that I, too, am trying to play my little part in keeping our country before the eyes of the empire. I am more proud than I can say of the way in which Canada fulk in the eyes of the world today. She has risen from the slow provincialism to the sure and enterprising progressiveness of a second rate power in the world. The young men used to look to Canada as a plague were after them. They stay now to scoop the fruits of progress."

Montreal, Aug. 23.—Gerilmo Patzar, a convicted murderer, was sentenced to a term in the St. Vincent de Paul penitentiary.

It is claimed by the local police that the condemned murderer, Patzar, was convicted on the evidence of murderers. One of the men, they say, has been hanged, in connection with the murder of a Syrian peddler named Green, in New Brunswick, whilst the other, it is claimed, is now serving a life term in a New Brunswick penitentiary.

Chief Campan is convinced of the fact that a miscarriage of justice has taken place, and he has accordingly authorized his officers to take whatever steps they deem necessary to remedy matters.

Mr. Leopold Houle, acting for the condemned man, made formal application to the honorable C. J. Doherty, minister of justice, for a complete pardon. The petitioners do not ask for a ticket of leave, or a new trial. They want a full pardon under the great seal of the governor-general in council.

Hamilton, Aug. 25.—William Clark of no address, is in the toils, charged with having assaulted Henry Goldberg of the St. George hotel. Along with the count are separate charges of resisting arrest, escaping from custody and assaulting the police. According to eye-witnesses of the arrest Clark put up a stiff battle before finally becoming subdued by no fewer than nine constables.

After breaking free from the hotel man in whose place he row was said to have been started, the man ran across the market and almost into the arms of one of the minions of the law. Dogging him, he started round the corner of James and Mulberry streets only to trip and fall. Two constables who were standing there attempted to get him, but he showed fight and they were forced to call for assistance.

Such there were nine on the scene, and such a battle ensued that it took them all their time to place the handcuffs upon him. Even these were found insufficient to hold the prisoner, it being necessary to shackle his feet. Clark's wife is also alleged to have taken part in the melee, the claim being made that she used a beer bottle for the backs of the constables as they were stooping over their man.

THOUSANDS WORK ON STATE ROADS

Missouri Goes at Good Highway Legislation in Right Spirit—Girls Carry Water.

St. Louis, Aug. 2.—Thousands of men throughout the eastern half of Missouri today responded to the call of Gov. Major, asking able-bodied men to lay aside their regular tasks today and to devote their time to the roads. In St. Louis county, however, the response to the governor's call was slight, as the county is well supplied with rock roads. The roads of the county are maintained by a heavy tax. Business men of St. Louis city, however, though there was no opportunity for them to work on the roads, contributed liberally to a fund with which to buy road grading machinery for the rural parts of the state.

The response to the governor's call throughout the rural districts was noteworthy. In Cape Girardeau county, in southeastern Missouri, 2,500 men worked on the roads and every district was organized. The road work here is to be permanent.

Greatest Day in Life. "It has been one of the greatest days of my life," said Governor Major. "As a boy I traveled over nothing but bad roads. I made up my mind then if I could for better highways. The governor of Arkansas has notified me he has set aside September 2 and 3 for road work, and I am happy at the results."

Intend to fix two road days when I return home," said Gov. Hodges of Kansas. "It is remarkable how many have responded to Gov. Major's proclamation."

Corporation of the District of Burnaby

BYLAW NO. 170. A Bylaw to Amend Bylaws Nos. 120a, 121a, 122, 123, 129, 142, 143, 144 and 145.

WHEREAS the Municipal Council of the Corporation of the District of Burnaby on the Twentieth day of January, 1913, finally passed By-law No. 120a, being a by-law to enable the Corporation to raise by way of loan the sum of Eighty-four Thousand Dollars (\$84,000.00) for Street Purposes, the said by-law being known as "Burnaby Road Improvement Debenture By-law 1912."

AND WHEREAS the Corporation by the said By-law authorized the issue of debentures to the amount of Two Hundred and Fifty Thousand Dollars (\$250,000.00) to be payable on the Twentieth day of December, 1922, and to bear interest at the rate of four and one-half per centum (4 1/2 per cent) per annum payable half-yearly.

AND WHEREAS the Corporation by the said By-law authorized the issue of debentures to the amount of Fifty Thousand Dollars (\$50,000.00) to be payable on the Twentieth day of January, 1912, finally passed By-law No. 122, being a by-law to enable the Corporation to raise by way of loan the sum of Two Hundred and Fifty Thousand Dollars (\$250,000.00) for the purpose of providing and building additional sidewalks within the limits of the Municipality, the said by-law being known as "Burnaby Sidewalks Extension By-law 1912."

AND WHEREAS the Corporation by the said By-law authorized the issue of debentures to the amount of Fifty Thousand Dollars (\$50,000.00) to be payable on the Twentieth day of February, 1912, finally passed By-law No. 123, being a by-law to enable the Corporation to raise by way of loan the sum of Fifty Thousand Dollars (\$50,000.00) for the purpose of providing and building additional sidewalks within the limits of the Municipality, the said by-law being known as "Burnaby School Board Loan No. 1 By-law 1912."

AND WHEREAS the Corporation by the said By-law authorized the issue of debentures to the amount of Fifty Thousand Dollars (\$50,000.00) to be payable on the Twentieth day of February, 1912, finally passed By-law No. 124, being a by-law to enable the Corporation to raise by way of loan the sum of Fifty Thousand Dollars (\$50,000.00) for the purpose of providing and building additional sidewalks within the limits of the Municipality, the said by-law being known as "Burnaby School Board Loan No. 2 By-law 1912."

AND WHEREAS the Corporation by the said By-law authorized the issue of debentures to the amount of Fifty Thousand Dollars (\$50,000.00) to be payable on the Twentieth day of February, 1912, finally passed By-law No. 125, being a by-law to enable the Corporation to raise by way of loan the sum of Fifty Thousand Dollars (\$50,000.00) for the purpose of providing and building additional sidewalks within the limits of the Municipality, the said by-law being known as "Burnaby School Board Loan No. 3 By-law 1912."

MURDER AT VICTORIA IS DEEP MYSTERY

Killing of Campbell on Old Reserve a Brutal Affair—Police Baffled at the Start.

Victoria, Aug. 25.—A particularly diabolical act was that of the murderer of Samuel Campbell, as the evidence at the inquest on Friday afternoon disclosed it. There were no less than nine bullet wounds in the body, all passing through trunk or limbs.

A Maniac's Job

It would be the sort of thing that a lunatic might be expected to do, or a person who had been seized with a homicidal mania, but then it is more than probable that there would have been other victims among the men who spend their nights on the old reserve where the body was found.

The police have no report of any escape from an asylum nor of anyone being at large suspected of insanity, and it does not seem as if any inquiry along that line would be of service.

Time Only Surmised

As to the time of the murder it can only be surmised. Dr. Raynor said at the inquest that the stage of decomposition would warrant a belief that the man had been dead for at least a week. This would be accounted for, however, by the great heat of the past few days. Less than six days intervened between Campbell being last seen and the finding of his body. It is the theory of the police and it is supported by the probabilities that the murder took place on Friday night last or early Saturday morning. That it must have taken place at night is absolutely certain, as nine shots could never be fired on any part of the reserve during the daytime without someone hearing them.

A Mystery

Everything points to Campbell finding his way over to the reserve some time after he was last seen and having crept in behind a fence or beneath a bush to sleep. He placed an old sack, such as men of his class carry their blankets in, under his head, lay down on his back and pulled an old bedspread over him.

But this adds to the mystery of his shooting. At night it would be practically impossible to see him where he was lying, and even by daylight many would pass within a few yards of the spot and not notice him there. It is possible that the murderer might have already been sleeping near the same spot, and resented the intrusion, but if he did he must have waited until the intruder had laid down before he fired. Another theory was followed, but against this is the fact that he was not known to have any enemies and that there is an entire absence of motive so far as can be seen.

The direction taken by the bullets proves that Campbell was lying down when he was shot, and though the wound in the head was fired with the

muzzle pointed at an angle of forty-five degrees from the direction of the other eight wounds. All were in such a position as to fit in with the theory that the murderer stood immediately at Campbell's right shoulder and fired point-blank down at him.

Nine Wounds

Dr. Raynor found nine distinct bullet wounds and as many holes of entrance, or eighteen holes in all. The first and most serious wound, in itself enough to cause instant death, entered at the left side of the nose and came out two inches above the right ear. A second has passed through the skin and muscle of the right arm, half way between the shoulder and the elbow, entering from the inner side. The third was a superficial wound through the skin of the right forearm. The fourth passed through the right hand, entering between the thumb and forefinger and passing out through the ring and little fingers, smashing the bones of the hand. The other five were through the right chest, lacerating the lung badly and causing a great flow of blood.

So far as the present outlook is for the discovery of the murderer of Samuel Campbell, the police seem to be up against a dead wall with no means of getting through or over it. Every member of the plainclothes force and some of the uniformed men are busy on it and every scrap of possible evidence is being closely scrutinized. There is an absence of clues and there were no affiliations of the dead man that would furnish any suspicion of anyone. If the murderer were one who did not know Campbell, which the police think possible, the personal element may be left out of the question altogether.

The red comforter which was lying over the body when found has been traced as one which was lying about the premises of the Empire hotel a couple of weeks ago. It and another one were lying about loosely where they were accessible to anyone, and being practically valueless to the house no question would be made if anyone walked away with them.

Automatic Used

Further careful of the search today, resulted in the finding of two more shells, making five in all that have been found. It is now almost certain that the revolver used must have been a nine-chamber automatic, and if it was it would mean that it was fully loaded and that the murderer kept pumping away until he had emptied it into the body. Who would have a weapon of this sort and be knocking around the reserve with it exercising the minds of the police?

The possibility of the murderer never being discovered recalls the last murder mystery which this city had. That was the Friedman case, which occurred in the spring of 1908. Friedman was returning home from the theatre with his wife and was shot just as he was opening the door of his house by someone who was waiting inside. In that case there were several lines of inquiry which offered themselves, but although all were followed up, the police were never able to assemble evidence that would justify an arrest.

I WANT TO TELL YOU LADIES!

NEW FIND MADE ON KASLO CREEK

Silver Lode Discovered Said to Be From Eight to Fifteen Feet in Width.

Kaslo, Aug. 26.—A new find has been made on the 12-mile section of the north fork of Kaslo creek. The property is known as the Helen group, and is being opened by Wm. English and Scott Thornburg. It is situated a mile or so south of the railway and the strike was made a few days ago on the surface of nearly eighteen inches of clean galena, running eighty per cent lead and over 100 ounces of silver. The latter figure by the lowest assay for the white metal obtained from any of the pieces sampled. The lode is said to be about 8 to 15 feet in width. The country rock is granite. Other parties owned the claims, of which there are three in the group, several years ago and by a 200 foot drift succeeded in gaining approximately 200 feet of depth on the ledge. No ore was found, however, in this development, but the present owners believe that if they had crossed-cut at intervals to the walls, they would have succeeded in finding ore. It is their intention to take advantage of the former fruitless development work at a later date. For the present operations are being stopped from the surface in a merry fashion and about half a carload of the stuff is at present ready for shipment.

TOO DEAR TO BUY

Victoria Property Might be Leased For Industries

Victoria, Aug. 25.—Holding that the price of land in the vicinity of Victoria is such as in many cases as to discourage the location of industries, and believing that some would be induced to locate if they could lease land from the city, Ald. Cuthbert has a notice of motion on the board dealing with the matter.

It proposes that the "proper officials be instructed to ascertain what land in the city or in the immediate vicinity can be leased for a term of years, not less than 25, with the purpose of being released by the city to new industries that may wish to locate in or near Victoria."

In Regina the city holds a considerable amount of land for this purpose, and other western cities with live civic committees have facilities of this character. The alderman observed this morning that the industrial development of Victoria is to grow and to make a livelier here. The motion will be moved on the earliest available occasion.

HOPPERS IN SWARMS.

Dayton, Wash., Aug. 25.—Reports from various sections of Columbia county have recounted the presence of large numbers of grasshoppers during this month. On the north side of the county they have invaded the small ranches, taking everything green in sight. In this city they are far more numerous than usual and have attacked family washes, partially destroying linen and articles of apparel. The O. W. R. & N. motor train coach catcher was literally covered with the grasshoppers.

MARRIED HER TO GAIN A LIVING

This is Allegation in Tangled Suit Started Against Widower by His Wife's Sister.

Portland, Ore., Aug. 25.—The story of the marriage of Mary A. Burke to Augustus B. F. Orr, 15 years her junior, at Oregon City, December 11, 1911, and the subsequent death of the former in this city July 19, 1912, has a sequel in the filing of a suit by Mrs. Margaret Humason, of Spokane, a sister of Mrs. Orr, in the circuit court of Multnomah county, praying that the marriage of Mr. and Mrs. Burke-Orr be declared null and void and that the estate of Mrs. Burke-Orr, estimated to be worth \$85,000, be given to her as the only direct living heir.

Miss Mary A. Burke, was a well-known resident of Portland and lived with her brother, Henry Burke, for many years. Her marriage to Orr was a subject of much gossip as was the marriage of her brother, Henry, to Miss Bertha Palser a short time afterward.

In her complaint Mrs. Humason alleges that Orr caused her sister's death prematurely by inducing her to use intoxicating liquors and drugs.

Collusion in Divorce.

The divorce of Orr from a former wife that paved the way for his marriage with Miss Burke is alleged to be void and of no effect because the circuit court of Clackamas county, in which it was obtained, had no jurisdiction, because Hannah M. Orr, the former wife, had not for more than one year prior to filing suit been a resident of Oregon. It is further alleged that the divorce was not asked for by Hannah M. Orr in good faith, but in collusion with Orr, and that it was understood and agreed between them that Orr would, after the divorce, intermarry with Mary A. Burke and

BELIEVED DEAD BUT MUCH ALIVE

Man on His Way to Vancouver Almost Was Subject of Memorial Service in Glasgow.

Glasgow, Aug. 24.—A remarkable story of how a Peterborough man came to life again after being "dead," is as strange as could be imagined.

Mr. and Mrs. Robert Barnes of Harsis street, New England, Peterborough, received a letter from Moose, Jaw, from their son, George, conveying the sad tidings that his brother, Robert William Barnes, who only left in England in May to take up a position as analyst and assayer in a mining company in Vancouver, fell ill and died within eight days of his arrival.

The news was also cabled to a Mr. Field, of Lincoln Road, Peterborough, who was asked to inform the family. For some reason the cablegram was never received, with the consequence that the letter received came as a great shock.

Mr. Barnes was a prominent Wesleyan local preacher, and arrangements were at once made for the holding of a memorial service at the New England Wesleyan chapel on Sunday.

A further letter, however, arrived from George Barnes, which stated: "Dear Parents: This is really good news. You may cancel my last letter. Have just heard from Bill, and he has got better and is now at work. The report given to me was incorrect. Was going to Vancouver to make funeral arrangements, but got stopped. When I come home I will tell you how the strange news was given to me in a stark. By the way, I thought I had lost him, but I am glad to know that such is not the case."

Mr. P. William Barnes, before going to Canada, was at Hull, where he sustained a bruise over the ear, and after attendance by a doctor a cure was pronounced. But it seems that the injury accounts for what has happened in Canada.

The medical explanation of the affair is that a clot of blood had formed in the neighborhood of the bruised ear, and remained unsuspected. The fatigue of the journey and the vibration of the Canadian train probably unsettled the clot, which moved over the brain and caused the coma which led the doctors to pronounce death.

OLD MAIDS GOOD RISKS.

They Live Long and Insurance Men Like Them.

Minneapolis, Aug. 25.—Old maids live long and are good insurance risks.

CARELESSNESS CAUSE OF MANY ACCIDENTS

London, Aug. 24.—Mr. Pease, min-trade general report upon accidents on the railways of the United Kingdom during the year 1912 states that the casualties to passengers in accidents caused by the movement of trains and railway vehicles, other than train accidents, are reported to be much more numerous than those caused by train accidents, but they are described as differing from the latter in that they largely arise from the carelessness of the passengers themselves. The number of persons killed was 1,010, and injured 8,700, a decrease of 60 in the number killed and an increase of 355 in the number injured as compared with the figures of 1911. In addition to accidents caused by the running of

TEMPERATE COLONEL LOOKS FORWARD TO SNAKE DANCE

Boswell, B. C., Aug. 25.—There will be a meeting of the Boswell-Kootenay Lake union on Sunday afternoon, August 31. The sub-committee appointed to carry out arrangements for the local fruit and vegetable show to be held in connection with the Boswell exhibit at the Nelson fair will hand in its report. Several handsome prizes have already been donated.

TWO DECAYED TEETH CAUSED HIS DEATH

Spokane, Aug. 24.—Two bad teeth caused the death of Guy Estey, aged 38, at the Sacred Heart hospital yesterday, just ten days after he had two aching and ulcerated teeth removed.

On August 8, Estey, who had been employed at work on the Sunset boulevard, after enduring a severe toothache for some days, had the offending molars extracted, though not before severe ulceration had set in. While their removal gave relief from the toothache, the infection from the ulceration caused the spread of blood poison through his system and the first of last week Dr. J. H. Hoxsey was summoned to care for the sick man, who had been taken to his parents' home at E1529 Second avenue.

"On my first visit," said Dr. J. H. Hoxsey last night, "I saw that Estey was then suffering from general septicæmia and on Wednesday ordered his removal to the Sacred Heart hospital, but it was impossible to save him."

"I have heard of cases in which deaths have resulted from diseased teeth, but it is quite rarely that death is caused in this way nowadays."

The body was sent to the New England undertaking rooms, where it awaits funeral arrangements. A brother, Dan Estey, and a sister are the surviving relatives.

HURLED ON HIS HEAD FROM SPEEDING MOTOR CYCLE

Spokane, Aug. 25.—Hurled headlong over the handle bars of his motor-cycle while speeding 25 miles an hour on Orchard avenue, William Smith, aged 20, an employee of the Spokane Cycle and Supply company, struck on the hard roadway, sustaining concussion of the brain, from which he is not expected to recover.

Young Smith, with a friend, Elmer Smith, on the rear seat of his machine, together with another friend, Clyde Crutchfield, who rode a single seated machine, were on their way from the city to Liberty lake to spend the evening with the injured lad's sister. They had just turned into the Liberty lake road when Smith's machine struck a wagon rut, from which he was unable to release the machine before it fell.

Elmer Smith, on the rear seat, was also thrown into the road and rolled over and over, but escaped without a scratch.

Crutchfield raced his machine to the home of Dr. Silas Yarnell and the doctor brought the injured lad to Spokane general hospital after a hasty preliminary examination had showed serious injury. Dr. J. H. Hoxsey was summoned on the arrival at the hospital, as was also the young man's mother and sister, with whom he lived.

Church for Edgewood.

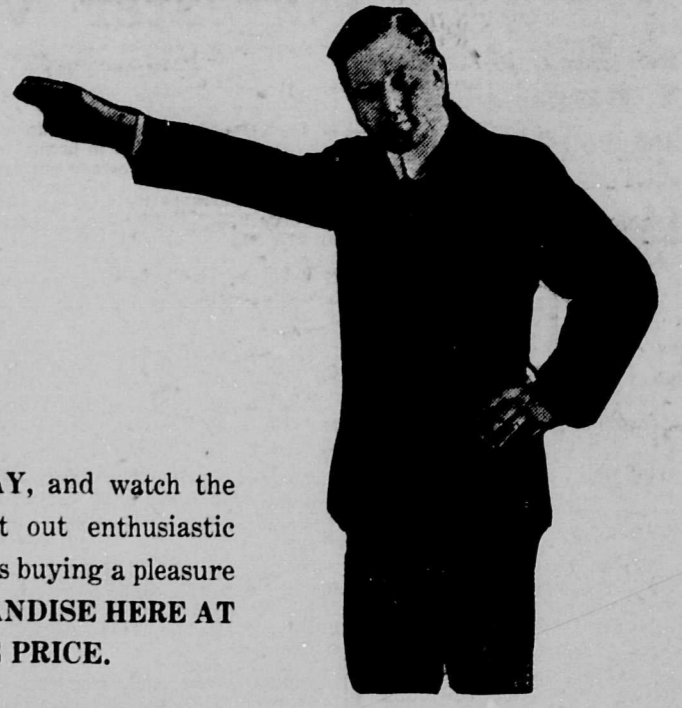

Edgewood, B. C., Aug. 25.—J. N. McLeod, building contractor of Edgewood, has the contract for the building of the new St. Agnes church at Edgewood. Operations will be started immediately. The plans, which were drawn up by Percy Coates, call for apartments to be used as a vicarage, below the church, which will be situated on the side of a hill overlooking Edgewood and the Arrow lakes.

During the absence of L. B. Lusby and family at Crescent Mr. Lusby's residence, 215 Royal avenue, was broken into and robbed. Among the articles stolen were a gold watch and jewelry. The loss is estimated at \$480.

Mrs. C. C. Fisher, 603 Third avenue, will reopen her music classes on Monday, August 25. All pupils are requested to start at the commencement of the term to ensure success. Vacancies for a few more pupils. (1939)

The body of J. Buckley, fisherman, who was drowned in the Fraser river near Hammond a week ago, was recovered yesterday. The body got entangled in one of the fishing nets six miles from where Buckley lost his life.

Burquitlam persons wishing to show what the district can produce will send anything they wish towards Vancouver district exhibit to W. Whiting not later than August 27. (1903)

Recent changes in the officers at the local Y. M. C. A. were formally ratified at last night's meeting of the board of directors. The retiring general secretary, Mr. Robinson, was thanked for his untiring services and the results of his efforts commended. Mr. Barnes, the new secretary, was formally welcomed by the directors, and was introduced by the western field territorial secretary, Mr. Ballantyne, who came to this city yesterday.

For pressed brick, fire clay, common brick, cement, lime, plaster, gravel, sand, rock and fuel oil, apply to the B. C. Transport Co., Ltd. Office phone 825, wharf phone 889. (1829)

This week will see the completion of the paved highway between Edmonds and Central Park, the top dressing of the last stretch near Royal Oak, being expected to be in place some time today, or Wednesday. The portion between Edmonds and Tenth avenue is being rushed to completion and the entire contract will probably be finished by the second week in September.

Word was received in the city yesterday of an accident which took place near Abbotsford when an auto owned by a Vancouver party ditched, while rounding a sharp curve, throwing the occupants out. A Mrs. Sutherland was brought into the city later in the day by W. G. Gevevy, of Seattle. Her injuries were attended to, and later she was taken to Vancouver. The car was said to be damaged somewhat.

Fred Davis will sell by public auction absolutely without reserve (under instructions from H. J. Russell) the household furniture and effects at 812 Fourth avenue, on Wednesday, August 27, at 2 p.m. sharp. Sale will include very fine organ, drop head Singer sewing machine, dining room suite, beds, springs and mattresses, chiffoniers and dressers, range, heater, kitchen utensils, etc. Everything must be sold at any price. Sale 2 p.m. sharp. (1942)

The work of the Home Reunion association is of a quiet, unostentatious nature, but is none the less beneficial and patriotic. To assist on a strictly business basis the reunion of dependant families with the bread winners, who are temporarily financially incapacitated, from effecting it themselves, is the chief object of the association. The applications are scrutinized minutely and the money advanced only to respectable citizens located in the city to bring out their families. Two applications were passed yesterday morning, making seven in all since the association began operations.

USING A MACHINE GUN.

What Happens When Prices Are All Shot to Pieces.

When a man takes an axe and cuts prices down he is entitled to some attention, but when he takes a machine gun and shoots them all to pieces, everybody becomes curious and investigates.

Such briefly, is the tale of happenings in the A. J. Birch whitewear house on Columbia street, where H. T. Lacelle has taken charge with instructions to clear the shelves before the lease expires. And he's clearing them. Of course if these shelves didn't carry some of the best bargains every offered in the city, they wouldn't clear at any price, but they do and the crowds of appreciative buyers are helping Mr. Lacelle to accomplish his desire with astonishing rapidity.

Mrs. S. Roe will meet her pupils for piano and theory this week. (1946)

Arrangements are being made by the B. C. Telephone company to replace about 200 feet of the submarine cable at the Fraser river bridge, which went out of commission last Friday morning. This section has been found to be dampened by the leakage and will be replaced with new material once it arrives in the city. The temporary cable across the river, at a point near Abbotsford, is answering the purpose of the company, although the long distance copper lines running through to Bellingham are hampering the work considerably for the handling of long distance calls.

TAXES 1913.

Municipality of Burnaby. Tax demands for the current year having all been issued and as the rebate period will expire on August 25, owners who have not received their notices will oblige by communicating with the undersigned immediately, giving full description of their property. W. H. GRIFFIN, Collector. (1840) Edmonds.

HERE'S YOUR CHANCE.

Amateur Gardens to Get Prizes at Exhibition.

The city man growing a few vegetables or a little fruit in his back yard, or the man in the country with but a little patch available for this purpose, will find an excellent opportunity to exhibit his best specimens at the provincial exhibition, which opens in this city on September 30 and continues until October 4. For special prizes have been offered for this class of exhibitors.

This competition is open to amateur gardeners in Vancouver, New Westminster and the districts.

Through their Vancouver manager, the Hudson's Bay company has offered a dining room suite valued at \$100 for the best cottager's exhibit. That is, an exhibit made and arranged by an individual, of vegetables and fruit, grown in his own garden and cared for in his spare time. A person making his living from fruit growing and vegetables is not entitled to participate.

A second prize of a set of harness valued at \$40 has been offered by James Jolley & Sons, of Hamilton, through the city of New Westminster, T. J. Trapp & Co. The third prize is a cart valued at \$30 and the fourth is five squares of medium Red Kalor-old roofing.

LIGHT ON LIGHT SUBJECT.

Which Are Better, Clusters or Singles?

Spokane, Aug. 25.—A scientific investigation of the comparative merits of the present five-cluster light, used in front of several downtown buildings, and the new one-lamp light that has been proposed, is being carried on by Arthur D. Jones, J. L. Paine and John W. Graham, the committee appointed to study the downtown lighting system.

It was their intention to engage a civil engineer to do this work, but finally arrangements were made with City Engineer Morton McCartney to make the investigation. He will submit his report to the committee in the near future.

The committee will take his findings and on them base their report, which will be submitted to the city council with recommendations regarding the lighting scheme. The city engineer will compare the distribution of the two types of street lamps and report on the comparative cost of each. Estimates furnished the committee would indicate that the new light furnishes a better distributed light at about one-quarter the price. Investigations made at Butte and Missoula, where the new light is in operation, seemed to bear out these statements.

SHEEP TAKING TO OKANAGAN VALLEY

Industry Promises to Become Popular—Higher Coyote Bounty Desired.

Vernon, Aug. 25.—Sheep raising on a large scale may be made an entirely successful and eminently profitable industry in the Okanagan valley in British Columbia, according to George Heggie, of Vernon, who has himself demonstrated the feasibility of the project.

In the spring of this year Mr. Heggie, as manager of a large land company, which controls an immense acreage near Vernon, imported 1,800 head of sheep from Maple Creek, Sask. Though at first they encountered a number of adverse conditions, the sheep have thrived beyond expectation, and Mr. Heggie has determined to increase the flock to about 3,000, and keep at least 1,000 ewes on hand each year for breeding purposes.

At first the sheep, which had come direct from the prairies, did not take kindly to the hills, nor to the long grass, but once the range was cropped close they put on weight rapidly.

The success of the experiment will undoubtedly result in the establishment of a new industry in the Okanagan valley. Already a movement is afoot to urge the government to raise the coyote bounty from \$3 to \$5 in order to encourage owners of range lands to take up sheep raising. Okanagan valley sheep growers will have a home market. The butchers of the town of Vernon alone express willingness to handle from 50 to 100 sheep each week. At present most of the mutton used in the valley is imported. Vernon city and district are being benefited by a greater interest in hogs, poultry and mixed farming. Prevailing weather conditions are conducive to a fine crop outlook.

LIGHT-TOED MEX. COMES UP TOMORROW

In Police Court He Will Tell the Story of a Missing Gold Watch and Fob.

Cristobal Casis, the diminutive Mexican, who was picked up on Columbia street late Saturday evening on a charge of entering the room of Bert Murray and stealing a gold watch and fob, was remanded in police court yesterday morning on the request of the police, who will endeavor to look up a previous record of Cristobal in Vancouver and vicinity.

That he is mixed up with more than one crime is the belief of the police, owing to the way he addressed P. C. Bass a few minutes after the robbery, although speaking in Mexican.

P. C. Bass has travelled some. His knowledge of naval warfare is said to be on a par with any person's in the city, due to the fact that the aforesaid Mr. Bass has sailed the raging main, and his forefathers before him, hence the little Mexican confab between Bass and Casis. However Casis is still in durance vile and will remain so until Wednesday morning when Bert Murray and others are expected to grace the witness box.

IT COMES HIGH, BUT THEY MUST HAVE IT

In the police court yesterday morning \$25 bail money and a flock of whisky were forfeited by an Indian who was charged with being in possession of the forbidden fluid.

Another drunk and disorderly abandoned \$10 to the police coffers rather than face the magistrate.

Another man for getting drunk and assaulting a police officer in the execution of his duty was fined \$25 and costs.

BURNABY WINS SUITS FOR TAXES IN ARREAR

His honor Judge Howay held a chamber court sitting yesterday and disposed of a number of applications. G. E. Martin, of McQuarrie, Martin & Cassidy, on behalf of Burnaby municipality, was granted judgment against A. J. Passage for \$274 and costs, arrears of taxes. In the case of Burnaby against Loughheed, judgment for \$428.25 arrears of taxes was granted, judgment not to be taken out until end of week.

Toronto Market Steady.

Toronto, Aug. 25.—The stock exchange while not very active, was steady today. The sharp rally in MacDonald and Spanish river issues being a helpful factor. Spanish river recovered 2 1/2 points during the morning, going to 29, and MacDonald went up three points to 27. The big recovery was in Spanish river preferred. It did not sell here during the morning, but the bid was pushed up to 65 without bringing out any stock.

WHAT SOME PEOPLE WILL FALL FOR

Tale of Magic From Washington State That Sounds Like Chapter From Crusading Times.

Spokane, Aug. 24.—With a piece of quartz which he claimed was a charm-stone from the wall of Gethsemane, near Jerusalem, John P. Carmody, who claimed he was a mining engineer by profession, but a clairvoyant by hobby, came near getting \$60 in gold from Mrs. M. J. Nelson, who rooms at Second avenue and Howard street, according to testimony in a peculiar larceny suit in police court yesterday. He was arrested August 14 by Detective Fordyce and was yesterday convicted of larceny by trickery and sentenced to 90 days in jail.

Carmody, who got acquainted with Mrs. Nelson through her daughter, a maid at the Ripath hotel, where he was staying, got Mrs. Nelson, who is an ardent spiritualist to sleep with the quartz pebble under her pillow and so interested her in his discussion of clairvoyance, psychology and other things that she agreed to become party to an "experiment," as Carmody characterized it, by which she was to give him possession of three \$20 gold pieces from 1 o'clock until 7 o'clock that day.

Was to Return Money. Carmody's promise in court hinged on the question of whether he intended to bring back the gold or return it. Mrs. Nelson thought he would keep it if he got it and called the police in time to lay a trap for him. Carmody declared to Justice Witt that he would have returned the money at all hazards.

The "experiment" was for Mrs. Nelson to make three little pockets, each the size of a dollar, and sew them to a belt large enough to reach around Carmody's waist. He was to wear the belt next his skin for several hours, and imbue it with his own "magnet-
